Application Flow: The project has 2 type of user – Customer and Doctor and other will be Admin which takes care to all the user. The roles and responsibilities of these two types of users can be inferred from the API endpoints defined in the code. Here is a summary:

Customer/Ordinary:

1. Create an account and log in to the system using their email and password.
2. They will be shown automatically all the doctors in their dashboard.
3. After clicking on the Book Now, a form will generate in which date of appointment and documents need to send.
4. They can see the status of their appointment and can get a notification if the appointment is scheduled or not.
5. The user can also cancel its booking in booking history page and can change the status of booking.

Admin:

1. Manage and monitor the overall operation of the appointment and the type of users and doctors to the application.
2. He monitors the applicant of all doctors and approve them and then doctors are registered in the app.
3. Implement and enforce platform policies, terms of service, and privacy regulations.

Doctor:

1. Gets the approval from the admin for his doctor account.
2. Manages all the appointments that are getting from the users
